Plant and Soil **173**: 355–358, 1995.

Contents Volume 173 (1995)

Editorial 1

Research articles

Root growth, microbial activity and phosphatase activity in oil-contaminated, remediated and uncontaminated soils planted to barley and field pea 3–10
J.G. Xu and R.L. Johnson

The influence of nitrogen and potassium supply on the ammonium content of maize (*Zea mays* L.) leaves including a comparison of measurements made in vivo and in vitro 11–20
J. Gerendás, R.G. Ratcliffe and B. Sattelmacher

Iron toxicity and stress-induced ethylene production in rice leaves 21–28
M. Yamauchi and X.X. Peng

Interaction between barley and mixed cultures of nitrogen fixing and phosphate-solubilizing bacteria 29–37
A.A. Belimov, A.P. Kojemiakov and C.V. Chuvarliyeva

Influence of Norway spruce seedlings on the nutrient availability in mineral soil and forest floor material 39–45
G. Hallsby

Nutrient accumulation and distribution of wheat genotypes in response to waterlogging and nutrient supply 47–54
B. Huang, J.W. Johnson, D. Scott NeSmith and D.C. Bridges

Sorghum, wheat and soybean production as affected by long-term tillage, crop sequence and N fertilization 55–65
A.J. Franzluebbers, F.M. Hons and V.A. Saladino

Liming induced stimulation of the amino acid metabolism in mycorrhizal roots of Norway spruce (*Picea abies* [L.] Karst.) 67–77
J. Dähne, D. Klingelhöfer, M. Ott and G.M. Rothe

Consequences of liming and gypsum top-dressing on nitrogen and carbon dynamics in acid forest soils with different humus forms 79–88
S. Belkacem and C. Nys

Aluminium/silicon interactions in barley (*Hordeum vulgare* L.) seedlings 89–95
K.E. Hammond, D.E. Evans and M.J. Hodson

Dual inoculation with *Aspergillus fumigatus* and *Glomus mosseae* enhances biomass production and nutrient uptake in wheat (*Triticum aestivum* L.) supplied with organic phosphorus as Na-phytate 97–102
J.C. Tarafdar and H. Marschner

Influx and efflux of organic acids across the soil-root interface of *Zea mays* L. and its implications in rhizosphere C flow 103–109
D.L. Jones and P.R. Darrah

The effects of grazing and burning on soil and plant nutrient concentrations in Colombian páramo grasslands 111–132
R.G.M. Hofstede

Effect of aluminium on yield and plant chemical concentrations of some temperate legumes 133–145
D.M. Wheeler and M.B. Dodd

Fine-root morphology and uptake of ^{32}P and ^{35}S in a Norway spruce (*Picea abies* (L.) Karst.) stand subjected to various nutrient and water supplies 147–155
A. Clemensson-Lindell and H. Asp

In-situ root extent measurements by electrical capacitance methods 157–165
F.N. Dalton

Significance of nitrate leaching and long term N immobilization after deepening the plough layers for the N regime of arable soils in N.W. Germany 167–175
R. Nieder, K.C. Kersebaum and J. Richter

Erratum 177–190

Research articles

Modelling organic carbon turnover in cleared temperate forest soils converted to maize cropping by using ^{13}C natural abundance measurements 191–196
D. Arrouays, J. Balesdent, A. Mariotti, C. Girardin

Increased uptake of native soil nitrogen by roots of *Lolium multiflorum* Lam. after nitrogen fertilization is explained by a stimulation of the uptake process itself 197–203
M. Léon, P. Lainé, A. Ourry, J. Boucaud

Mobilization of the reserve N in citrus 205–210
F. Legaz, M.D. Serna, E. Primo-Millo

Natural rhizobial populations and nodulation status of woody legumes growing in diverse Kenyan conditions 211–224
D.W. Odee, J.M. Sutherland, J.M. Kimiti, J.I. Sprent

Estimation of the increase in CH_4 emission from paddy soils by rice straw application 225–231
A. Watanabe, Y. Satoh, M. Kimura

Growth enhancement of *Citrus reshni* after inoculation with *Glomus intraradices* and *Trichoderma aureoviride* and associated effects on microbial populations and enzyme activity in potting mixes 233–238
A. Camprubí, C. Calvet, V. Estaún

Genotypic variation in the effect of salinity on fertility in rice 239–250
S. Khatun, C.A. Rizzo, T.J. Flowers

Allelopathic potential of an annual weed, *Polypogon monspeliensis*, in crops in India 251–257
Inderjit, K.M.M. Dakshini

Importance of seed Zn content for wheat growth on Zn-deficient soil. I. Vegetative growth 259–266
Z. Rengel, R.D. Graham

Importance of seed Zn content for wheat growth on Zn-deficient soil. II. Grain yield 267–274
Z. Rengel, R.D. Graham

Effects of herbicide chlorsulfuron on growth and nutrient uptake parameters of wheat genotypes differing in Zn-efficiency 275–282
B. Dong, Z. Rengel, R.D. Graham

Mineralization-immobilization and plant uptake of nitrogen as influenced by the spatial distribution of cattle slurry in soils of different texture 283–291
P. Sørensen, E. Steen Jensen

Symbiotic properties of 5-methyltryptophan-resistant mutants of *Bradyrhizobium japonicum* 293–298
W.J. Hunter, L.D. Kuykendall

Effects of water and nutrient applications in a Scots pine stand to tree growth and nutrient cycling 299–310
P.H.B. de Visser, N. van Breemen

Relationship between initiation of cell elongation and cell division in radicles of germinating seeds 311–316
N.V. Obroucheva, O.V. Antipova, E.N. Gorbova, L.M. Kotova

Root water uptake by kiwifruit vines following partial wetting of the root zone 317–328
S.R. Green, B.E. Clothier

Interactions of calcium sulfite with soils and plants 329–335
K. Dale Ritchey, T.B. Kinraide, R.R. Wendell

Survey of indigenous bacterial endophytes from cotton and sweet corn 337–342
J.A. McInroy, J.W. Kloepper

Short communications

Association of ectomycorrhizal mats with Pacific yew and other understory trees in coniferous forests 343–347
R.P. Griffiths, A.C. Chadwick, M. Robatzek, K. Schauer, K.A. Schaffroth

The effect of nitrogen on fine white root persistence in cherry (*Prunus avium*) 349–353
L.A. Mackie-Dawson, S.M. Pratt, S.T. Buckland, E.I. Duff

Contents volume 173 (1995) 355–357
